### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2009.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## **DETAILED ACTION**

### ***Response to Applicant's Arguments / Amendments***

This Office Action is responsive to the amendment filed on 2/24/09. Claims 1-13 are pending. Claims 1, 3, 7, and 8 have been amended. Applicant's arguments have been considered, however, upon further consideration, the instant claims are rejected under new grounds of rejections and thus, claims 1-13 are finally rejected for the reasons of record.

Applicant's Remarks filed 2/24/09 are drawn to the former rejection and are now considered moot because of a new grounds of rejection taught herein.

### ***Claim Objections***

The claim objection over claim 1 has been overcome due to Applicant's amendments to the claim.

### ***Claim Rejections - 35 USC § 112***

The 35 U.S.C. 112, first paragraph rejection over claim 3 has been overcome due to Applicant's amendments to the claim.

The 35 U.S.C. 112, second paragraph rejection over claims 7 and 9-13 have been overcome due to Applicant's amendments to the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergeson.

Bergeson teaches a dishwasher having a tub 11 and sump pump assembly 35. The side wall of tub 11 (first portion of washing water storing portion) is outfitted with an inlet water system 71 (water supply connector). The bottom wall 30 of the fluid container houses an arcuate heating element 75 (heater) which is inserted into a hole formed in the bottom wall 30, and supported therein by a plurality of supports 76.

The wall formed by the bottom wall 30 connects to a central recess 31, then connects to a housing 80 by retainer clips 85 (this forms an L-shaped covering which reads on Applicant's claims for a preventing rib formed along an edge of the outer bottom surface of the washing water storing portion). Moreover, this wall is adjacent to the so-called heater insertion hole, wherein the arcuate heating element 75 is inserted into a hole in the washing tub wall 30 by supports 76.

***Claim Rejections - 35 USC § 102 / 35 USC § 103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1792

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bergeson (US Patent No. 3,963,046).

Bergeson teaches the claimed invention wherein the water supply is 71 is attached to a side wall of the tub (first portion), and thus formed in a generally vertical manner, also Bergeson teaches the heating element 75 is inserted into the horizontal bottom wall 30 of the tub, thus being somewhat horizontally formed (second portion). It may be unclear as to whether these so-called “first and second portions” are formed opposite of one another. Examiner contends they are formed at opposite parts of the bottom half of the wash tub. However, alternatively, if they are not considered to be placed in an opposing relationship, it would have been obvious to one of ordinary skill in the art at the time of the invention to make minor alterations to the design of the water inlet and heating element such that they are formed opposite to one another. Bergeson still teaches the main heating functions of the claimed invention wherein water that is supplied to the tub is heated. Moreover, Applicant has not shown that this “opposite” spaced relationship has a criticality. It appears that the invention would perform equally

Art Unit: 1792

well with other alternatively known arrangements between the heater and water supply unit and the selection of any of these known equivalents to provide water heating functions would be within the level of ordinary skill in the art.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
